

BASys Data Channel Interface

The BASys Data Channel Interface lets Bandag dealers submit credits for national-account delivery receipts electronically. With this interface, you can also download approved vendor credits into TireMaster for processing. Because it lets you move information between Bandag's Data Channel system and TireMaster, this utility can help you save more than just time!

The Data Channel Interface gives you the ability to do the following:

- Input information such as the cause of failure and the retread DOT at point of sale
- Download inventory and pricing information for fleet contracts
- Generate reports describing fleet customer and price information changes
- Generate reports that indicate whether information in the Bandag pricing file conflicts with fleet contracts set up in TireMaster

When reconciling Bandag claims, the National Account Reconciliation Report includes the status of files that have been submitted to Bandag. This gives you a record of your transmissions and indicates whether they were successfully processed.

The latest version of the Data Channel Interface is compatible with Bandag Data Channel 3.0.

ASA Tire Systems is a "Basic" vendor with Bandag's® BASys I.T. System for TireMaster. By choosing TireMaster, you can use a percentage of your PowerPlus Earnings for your point-of-sale software needs. Sit back, relax, and reap the rewards of choosing ASA as your business-management application provider!

Increase your productivity and decrease your costs by bringing this seamless integration into your business today. ASA continues to work with Bandag to bring dealers products to help them keep customers for life. To order the Data Channel Interface, call **800-657-6409**, email info@asatire.com, or visit www.tiremaster.com.

"Now I can submit credits, reconcile claims, and move information between my two systems. It has helped me save time, increase accuracy, and generate important pricing and inventory reports quickly and easily"
